# Says the dealer— "Uniformity"

"FINE quality, in gasoline or anything else, doesn't amount to much unless it is absolutely uniform. "It means a lot to the motorist to know that the Socony Gasoline sold in Bar Harbor is the same as that sold in Hartford or in Buffalo. Wherever you buy Socony you are sure to get the most in power and mileage that any gasoline can give you—and get it consistently. "Form that good habit of stopping at a Socony filling pump every time you need gasoline."

point, has led to a variety of speculation in the matter. Originally, the disposition of the temporary war-time cantonment, Camp Dix was in preference to Camp Devens to be retained by the government. It is no secret, however, that the secretary of war, through the action brought by influences affected by the situation, and by later investigation, has not particularly of the local choice of Camp Dix. It is only necessary to speak of the inefficiency of the public utility systems of war supply and heating at the New Jersey camp situated in the same buildings with the quartermaster detachment. The recruiting office is now in Building 11 at the head of F street, where, under direction of the recruiting sergeant, Edwin H. Davis, great progress is being made in enlistments.

Following several thefts of government property of late, strict instructions have been published to all officers and enlisted men to report all suspicious appearing characters, civilians or otherwise, to camp headquarters. Major Charles H. Rich of the 12th Infantry commanded the camp for three days last week, following the departure of Col. F. S. L. Price with the headquarters of the 13th Infantry at Fort Adams, R. I., which Capt. H. C. Sweeney, camp adjutant for some time past, and the quartermaster rank line officer, was announced as commanding officer of Camp Devens. Capt. Williams Jr., once adjutant of the 36th Infantry, but now assigned to Devens headquarters, has been assigned to detailing up a section of the railroad tracks near the quartermaster's office at a spur track to the boiler house which supplies heat to the boiler house. The necessity of unloading the coal at the trestle and rehandling it before trucking it to the boiler house is a transfer of the boiler house. E. O. Proctor, of Ayer, who was negotiating a motion picture booth at the camp in connection with the 14th Infantry, has withdrawn from that project now that the prospective patronage for this sort of entertainment is limited.
